

ROTO TT Vario Speed

Motor unit with stepless selectable revolution speed

The revolution speed is selectable stepless between 2'000 and 6'000 rpm. Depending from application and requirement you always have the ideal revolution speed at your disposal. This allows a more fatigue-proof work and increases the efficiency.

Safe admittance of all hand pieces in all sizes. Automatic stop gadget whilst hanging-up the hand piece.

The housing of the motor unit is made from high-quality stainless steel and corresponds to the degree of protection IP56. The coverage of the frequency converter is also made of robust stainless steel.

Quick exchange of flexible shafts guarantees short holding times and a high productivity.

Stepless selectable revolution speed.

Suspension attachment suitable for all hand pieces. Automatic stopping device whilst replacement of the hand piece.

Technical Data:

Voltage:	230V / 50 HZ
Power:	400 Watt
Speed:	2'000 to 6'000 rpm
Weight:	ca. 18 kg
Measures:	Height 50 cm Breadth 35 cm
Main Switch:	Trigger Switch On / Off
Push Buttons:	On / Off
Motor Protection:	3 Thermal Sensors
Sound:	56 dB
